

4 – 5 DECEMBER, 2019
09:00 – 17:00 (WED. – THUR.)
MINITAB PUBLIC TRAINING IN HONG KONG

Courses: Minitab Experimental Design (2-day)

Factorial Designs (Manufacturing) – 4 December, 2019

<http://www.minitab.com/training/training/courses/#factorial-designs-manufacturing>

Learn to generate a variety of full and fractional factorial designs using Minitab's intuitive DOE interface. Real-world applications demonstrate how the concepts of randomization, replication, and blocking form the basis for sound experimentation practices.

Develop the skills necessary to correctly analyze resulting data to effectively and efficiently reach experimental objectives.

DOE in Practice (Manufacturing) – 5 December, 2019

<http://www.minitab.com/training/training/courses/#doe-in-practice-manufacturing>

Learn how to handle common DOE scenarios where modifications to the analysis of classic factorial and response surface designs are necessary due to the nature of the response variable or the data collection process. Develop techniques for experimental situations often encountered in practice such as missing data and hard-to-change factors. Understand how to account for variables (covariates) that may affect the response but cannot be controlled in the experiment.

Minitab Technical Training Specialist: Mr. Ming Dong

Mr. Ming Dong has a Masters of Computer Science from the University of New South Wales, and a Masters of Applied Statistics from Macquarie University <http://www.minitab.com/training/training/trainers/#>

Course Fee: HK\$6,800.00 (Regular price: HK\$9,800.00)

Discounted Price: HK\$6,280.00

If Registered By Friday, November 15, 2019
